

William Jordan

In 2024 I've climbed over 200 pitches across 10 states, funding my climbing addiction through software engineering. Looking for an organization where I can bring my programming skills, be a contributing team member, and solve the problems at hand.

WORK EXPERIENCE

2024 – Present | Software Engineer

Two Islands Solutions

- Updated and modernized front-end of OPTS website
- Developed scalable components to be used site wide
- React framework

2021 – 2024 | Lead Software Engineer

Allen Yarnell Center for Student Success, Montana State University

- Maintained, optimized and added new features to our website for our 5,000 monthly users
- Led six-person development team and managed workflow applying agile development processes
- Primary troubleshooter and problem solver for outages and external connections
- Designed and developed auction and survey features using a LAMP stack

2022 – 2023 | Application Developer

Pennington Educational Research Laboratory, Montana State University

- Developed a research application for language impairment and/or autism in children
- Worked directly with primary investigator to achieve reliable research results across 30 metrics
- Managed deployment using a window's native electron app

EDUCATION

2020 – 2024 | Montana State University – Bozeman, MT

- BS Computer Science – Professional, GPA 3.7
- Concentration in software engineering

LANGUAGES & TECHNOLOGIES

Languages: Java, Python, JavaScript/TypeScript, PHP, HTML, CSS, SQL

Technologies: React, Git, Bash

Other: UI/UX design, Agile Development

HOBBIES:

- Rock Climbing
- Fine wood working
- Backcountry skiing
- Ultimate Frisbee
